

TRUECLONES X TRANSPLANTING GUIDELINES

ROOM CONDITIONS FOR TRANSPLANTING

Light Intensity

Day 1–4: 400 micromoles

Day 5–7: +500 micromoles

Temperature

78–84 degrees

Humidity

60%–75%

Light Cycle

18/6 or 20/4 on/off

Additional Notes:

- *The TrueClones X are used to lights on at 6 AM and off at Midnight.*
- *Plants are treated with horticultural oil before shipment.*
- *Plants are fertigated with 2.0-2.2 EC at 6.3 pH prior to shipment.*

TRANSPLANTING TIPS

- Plant the clone into your saturated preferred substrate.
- Make sure the clone is firmly secure so it stays upright.
- Fertigate with 2.2-2.5 EC at preferred pH.
