

# TRUECLONES X TRANSPLANTING GUIDELINES

## ROOM CONDITIONS FOR TRANSPLANTING

Light Intensity

Day 1–4: 250-300 micromoles

Day 5–7: 350-500 micromoles

Temperature

78°-82°

Humidity

70%–75%

Light Cycle

Delivered on a 18/6 schedule (recommended)

### Additional Notes:

- The TrueClones X are used to lights on at 10:30 PM and off at 4:30 PM.
- Plants are fertigated with **2.0-2.2 EC** solution prior to shipment.

### TRANSPLANTING TIPS

- Plant the clone into your saturated preferred substrate.
- Make sure the clone is firmly secure so it stays upright.
- Fertigate with **2.2-2.5 EC** at preferred pH.
